Art Unit: 2879

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15 and 34-43, drawn to an EL and a video display device and their method of making, classified in class 313, subclass 498.

II. Claims 17-33, 44 and 45, drawn to an OMESFET and its method of making, classified in class 257, subclass 10.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are not related to each another unrelated.

3. Alternatively the Examiner restricts the groups into two separate species as follows: This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: An EL and a video display device; claims 1-15 and 34-43; and

Species II: An OMESFET; claims 17-33, 44 and 45.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the

Art Unit: 2879

claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or

Art Unit: 2879

admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group (species)I is not required for Group (species) II, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. William Patterson on July 08, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2879

their different classification, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
